

STANISLAV TROCYUK

PROFESSIONAL EXPERIENCE

Experienced frontend developer who has been through the fire of fintech, weathered the highs and lows of freelancing, and come out with solid experience and self-confidence. I enjoy solving complex problems, exploring new tools, and constantly expanding my area of expertise. My core strength is building SPA and PWA applications with React, TypeScript, and Next.js, but my experience goes beyond the client side. I've worked with NestJS on the backend (building product modules, shopping carts, payment integrations), configured CI/CD pipelines, and set up production servers with Nginx and SSL. I've also contributed to architectural decisions, mentored junior developers, and helped establish frontend code conventions.

I'm comfortable working both independently and as part of a Scrum team, I take feedback constructively, and I'm always open to conversations with interesting people. My goal is to keep growing as a developer—learning new technologies and collaborating with cool professionals along the way.

WORK EXPERIENCE

InLog

Jan 2022 - March 2023

- As part of the team, he developed a LIS (LIMS) application for oil company employees on React+ TypeScript + Redux
- Participated in the construction of the application architecture
- Rewrote the state manager from Redux Thunk to RTK Query
- Developed a UI kit based on ShadCN
- Wrote REST requests to interact with the server
- Covered critical business features with Jest tests
- Independently developed dashboard and table builder for the website
- Configured CI/CD pipelines
- Configured Nginx and SSL certificates using Certbot
